

Silo Venting Filters SILOTOP® zero

**HIGH PERFORMANCE
FEW COMPONENTS**

CUTTING-EDGE DUST FILTRATION TECHNOLOGY

SILOTOP® zero is a cylindrically shaped dust collector for venting pneumatically filled silos. Its stainless steel body contains vertically mounted POLYPLEAT® filter elements. The air jet cleaning system is integrated into the hinged weather protection cover.

Dust separated from the air flow by special filter elements drops back into the silo after an integrated automatic pulse-jet air cleaning system has removed it from the filter media.

Air filtration capacity has been increased through new high performance filter media, which require less filter surface area. This results in a lower pressure drop and dust emissions of less than 1 mg/Nm³.
